Dear Mr. Roos, Dear Mr. Neumann,

In accordance with your verbal inquiry, I herewith issue the following reference for you:

The company Bautech GmbH, Germany in co-operation with company Bautech Russ, Russia carried out the following listed works at the brewery Kaluga:

1. All construction works.
2. Heating, Sanitary, Ventilation, Cooling.
3. All electro installation works .
4. All required planning works, all permissions and all final acceptances of the local authorities for the above mentioned works.

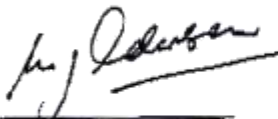

With reference to the documents placed at our disposal company Bautech had at peak times up to 1.250 employees working in this project.

The quality of the work performed by Bautech at all times exceeded expectations in spite of the adverse conditions under which they had to work. The majority of the work being carried out during the winter months of October to March.

We specially would like to point out that the project management was executed in an extremely professional manner.

I have no hesitation in recommending the company Brautech for similar tasks.

Yours sincerely,

Mike Anderson
Project Manager
